

Medication Safety at the Doctor's Office & Pharmacy

- Share with your doctor a list of your current medicines, vitamins, herbs and supplements.
- Whenever you get a new medicine, remind your doctor about allergies you have, or negative reactions you have had to other medicines.
- If you are taking a lot of medicines, ask your doctor if it is safe to take those medicines together. Do the same thing with vitamins, herbs and other supplements.

- Understand that more medications may not always be better for you. Ask your doctor how a new medication will help.
- Make sure you can read the handwriting on prescriptions. If you can't read it, the pharmacist may not be able to either. You can ask to have the prescription printed.
- Read the label on your prescription medicine. Make sure it has your name on it and the correct medicine name. Some medicines have similar names that can be confused.
- If you're not sure whether you are supposed to swallow or chew your medicine, ask your doctor or pharmacist. Also, ask your doctor or pharmacist whether you can cut or crush a medicine.

- Ask your doctor or pharmacist if it's safe to drink alcohol with your medicine.
- Take your medicine as it is prescribed and do not stop taking it without asking your doctor.
- Whenever you are in doubt about a medicine, ask your doctor or pharmacist about it.
